## ABOUT US

I am a fresh graduate, excited to start my career in web development and design. With a strong technical foundation, I possess knowledge of Html, Css, responsive web design, Bootstrap, and Photoshop. In addition to my technical skills, I've also developed a personal portfolio website and completed several projects that showcase my abilities. I'm eager to apply my skills and experience to innovative projects and continue learning and growing as a professional.

## PROJECT

### CarX

<https://carx-web.netlify.app/>

- CarX is a responsive car rental website developed using HTML and CSS, featuring a user-friendly interface with navigation menu and search filters. It offers a seamless car rental experience across phones, tablets, and computers.

### Netflix-Clone

<https://netflix-website.netlify.app/>

- I rebuilt a responsive Netflix clone, emulating the popular streaming service's user interface and experience. This project showcases the ability to create visually appealing and functional web applications that adapt seamlessly to different screen sizes and devices.

### My Shop

<https://my-shop-ecommerce-website.netlify.app/>

- I personally designed and developed an engaging e-commerce website, My Shop, to provide a great online shopping experience. Utilizing HTML and CSS, I incorporated responsive design principles to ensure a visually appealing and functional interface that adapts effortlessly to various screen sizes and devices.

### Food King

<https://food-king-website.netlify.app/>

- I developed Food king Website, Food King is an online food ordering platform. It features a user-friendly interface and menu system. The website has a secure checkout process and responsive design. It provides a smooth user experience for food enthusiasts.
